SUMMARY

Full-stack software engineer who designs and operates multi-tenant production systems end to end - mobile clients, REST and real-time backends, admin tooling, CI/CD pipelines, and AWS cloud infrastructure. Ships cross-platform mobile apps to the App Store and Google Play with tenant isolation and role-based security built into every layer. Experienced in migrating legacy systems to production cloud architecture and integrating AI/LLM features into live applications. Currently pursuing an M.S. in Data Science at Bellevue University.

TECHNICAL SKILLS

Languages: Python, Java, C#, Dart, TypeScript, JavaScript, SQL, HTML/CSS
Frontend: React, Next.js, Flutter (Riverpod, GoRouter, Dio), Vue.js, HTMX, Tailwind CSS
Backend: Node.js, Express, Django, ASP.NET, REST APIs, OpenAPI, WebSockets / Socket.IO
Cloud & DevOps: AWS (ECS Fargate, ALB, RDS, ElastiCache, S3, CloudFront), Azure, Docker, GitHub Actions, CI/CD, Vercel
Databases: PostgreSQL, MySQL, SQL Server, Redis, Firestore, Supabase
Auth & Access: JWT / OAuth (Google, Apple, Microsoft), Multi-tenant RBAC, QR scanning, Push notifications / deep links
AI Engineering: Gemini API, Groq, Genkit, multi-agent orchestration, pgvector RAG, LLM integration
Testing: Vitest, Jest, React Testing Library, Flutter Test, Postman

PROFESSIONAL EXPERIENCE

Full-Stack Software Engineer
NE Innovation Labs - Omaha, NE | Dec 2025 - Present

- Architected cross-platform Flutter applications for iOS and Android with JWT/OAuth authentication, deep-link and QR-based entry flows, and a shared mobile foundation reused across multiple client products.
- Built a multi-tenant Node.js/Express backend with isolated data scopes and org-level access control, enabling multiple products to share a single backend without sharing domain logic or application routes.
- Designed real-time event delivery using Socket.IO so UI state reflects only committed writes - keeping interfaces accurate under concurrent load and intermittent connectivity.
- Maintained 100+ automated backend tests and published API documentation to keep mobile and admin clients on shared contracts; validated system stability at 25 concurrent authenticated users with a 0% error rate.
- Developed AI-powered workflows using Genkit - prototyped on Gemini, deployed on Groq for production inference - delivering a context-aware user chatbot and automated administrative digest generation.
- Migrated a legacy Firebase prototype to production AWS (ECS Fargate, RDS, ElastiCache, S3/CloudFront) with Docker Compose, consolidating 2 mobile clients and a shared admin CMS onto one multi-tenant backend.
- Replaced manual build and deployment processes with a GitHub Actions CI/CD pipeline, adding automated test gates and multi-target deployments to Google Play, TestFlight, and Docker.

CIS Peer Tutor
Bellevue University - Bellevue, NE | Dec 2023 - Apr 2026

- Mentored 100+ students in Python, JavaScript, database design, and software engineering principles through one-on-one sessions and group workshops.
- Conducted code reviews focused on Clean Code practices, test-driven development, and system design fundamentals.
- Created structured review materials and database design rubrics adopted across multiple CIS course sections.

Junior Web Developer / IT Support Specialist
Pierson Wireless - Omaha, NE | Oct 2022 - Nov 2023

- Developed internal business applications using C# and Blazor with SQL Server, deployed through Azure CI/CD pipelines.
- Launched a web-based cost estimation tool that cut manual quote generation workload by 40%.
- Integrated safety compliance forms, hazard reporting, and a service desk ticketing system into the company's CMS.
- Automated user provisioning and directory synchronization (JumpCloud), reducing administrative overhead by 50%; managed endpoint security with CrowdStrike Falcon.

PROJECTS

YourOpoly - *Flutter, Node.js, MySQL, AWS ECS, Redis, Socket.IO, Gemini API* | App Store, Google Play

- Community rewards platform connecting players with local businesses through geo-validated QR check-ins, points, rewards, promotions, and live leaderboards.
- Implemented map-based discovery and location-driven gameplay with concurrent-safe leaderboard and progress updates backed by Redis caching.
- Background agent service tracks player activity and generates analytics digests; Redis-backed caching keeps leaderboard, and activity queries responsive at scale.

Good Life Bingo - *Flutter, Node.js, MySQL, Redis, Socket.IO*

- Map-based scavenger-hunt mobile client with multi-session play, geo-validated QR objective completion, and a live board that patches in real time as players progress.
- Push notifications and deep links alert players at progress milestones, driving re-engagement across sessions.
- Shares authentication infrastructure and admin tooling with the broader platform so new products integrate without rebuilding access control or administration.

Multi-Product Admin Platform - *Node.js, React / Next.js, MySQL, AWS*

- Centralized administrative console for managing permissions, content configuration, and platform-level operations across multiple tenant products.
- Layered administration model separates privileged internal controls from tenant-level self-service, with org-scoped RBAC enforced at the API layer.

E-Commerce Application - *Next.js, React, Supabase, PostgreSQL, Stripe, Vercel AI SDK* | Live Demo

- Production-style e-commerce demo with Supabase Auth, Postgres RLS-backed data models, Stripe Checkout, and webhook order persistence.
- AI design and admin copilots (Vercel AI SDK + AI Gateway) with pgvector RAG and server-side tool calling, gated behind automated contract evals in CI.

Django Reservation System - *Django, HTMX, Python, SQLite* | Live Demo

- Booking application with transaction-safe scheduling conflict resolution and automated email confirmation workflows.

Multi-Tenant Task Board API - *C#, ASP.NET Core, JWT, Azure, GitHub Actions* | Live Demo, GitHub

- Multi-tenant REST API using EF Core global query filters to enforce tenant data isolation at the ORM layer; GitHub Actions pipeline deploys to Azure App Service.

EDUCATION

M.S. in Data Science (*June 2028)* - Bellevue University, Bellevue, NE
B.S. in Software Development *(June 2025)* - Bellevue University, Bellevue, NE
A.A. in Computer Programming (*May 2023*) - Iowa Western Community College, Council Bluffs, IA

HONORS & AWARDS

Darrel H. Gottsch Endowed Scholarship | DREAM Scholarship |Dean's List | Omega Nu Lambda National Honor Society
